Delta Named to DJSI World Index for Three Consecutive Years, Ranked First in Six Criteria among World-leading Electronic Equipment, Instrument and Component Companies

Taipei, Taiwan, September, 24, 2013, Delta today announced it has been named as a member of the Dow Jones Sustainability Index (DJSI) World for the third consecutive year and also as member of the DJSI Emerging Markets, which was launched in early 2013. Selection as a one of the 42 leading companies in the Electronic Equipment, Instrument and Component sector included as DJSI components is a major international recognition for Delta's long-term commitment to corporate social responsibility and sustainability. Delta demonstrated its status as a world-class sustainability leader through the full marks received in "Risk & Crisis Management," "Water Related Risk," and "Occupational Health and Safety," and leading performance in "Codes of Conduct / Compliance / Corruption & Bribery," "Innovation Management," and "Labor Practice Indicators and Human Rights".

Mr. Yancey Hai, chairman of Delta Electronics, said, "Delta is dedicated to fulfilling its corporate mission "To provide innovative, clean and energy-efficient solutions for a better tomorrow" through the development of sustainable technologies and solutions. Delta's high-efficiency products and solutions have contributed to a total savings of 9.3 billion kWh of electricity and a reduction of carbon emissions by about 5 Million tons of CO₂e from 2010 to 2012. Energy savings from Delta's worldwide green building offices are as high as 8 million kWh per year, with its latest LEED-certified technology center in Taoyuan, Taiwan delivering annual energy savings of 53% through the utilization of Delta's building energy management solutions."

The Dow Jones Sustainability Indexes were launched in 1999 as the first global sustainability benchmarks. The indexes are offered cooperatively by RobecoSAM and S&P Dow Jones Indices. Each year, they invite the world's 2,500 largest companies, measured by free-float market capitalization, from the 59 sectors to report on their sustainability performance. The result of the Corporate Sustainability Assessment provides an in-depth analysis of economic, environmental and social criteria. The indexes serve as benchmarks for investors who integrate sustainability considerations into their portfolios, and provide an effective engagement platform for companies who want to adopt sustainable best practices.
